

Fabric Care Cards

Printable client leave-behind cards: cleaning method by material, one card per material.

CLIENT LEAVE-BEHIND

LEAVE-BEHIND

Fabric care cards

One card per material. Print, cut on the hairline, and leave the relevant cards with the client at handover.

VENETA · CARE Cellular shades Vacuum with a soft brush attachment on low suction, working across the cells rather than into them. Spot clean with a barely damp white cloth and blot dry. Never submerge a blackout shade: the foil liner can separate from the face fabric. Never use bleach, ammonia, solvent cleaners, steam cleaners, or a magic-eraser sponge. All of them remove finish, and finish damage is not a manufacturing defect. 1-855-558-1222 · venetawindowfashions.com/how-to-clean	VENETA · CARE Roller and solar shades Lower the shade fully and wipe the flat face with a damp microfibre cloth. Screen fabrics tolerate a little mild soap. Let it dry fully lowered before you roll it up, or you will trap moisture on the tube. Never use bleach, ammonia, solvent cleaners, steam cleaners, or a magic-eraser sponge. All of them remove finish, and finish damage is not a manufacturing defect. 1-855-558-1222 · venetawindowfashions.com/how-to-clean
VENETA · CARE Roman and sheer shades Dust only, then spot clean gently. Use a professional cleaner for anything larger than a spot. Washing removes the sizing that holds the folds and the shade will never hang the same way again. Never use bleach, ammonia, solvent cleaners, steam cleaners, or a magic-eraser sponge. All of them remove finish, and finish damage is not a manufacturing defect. 1-855-558-1222 · venetawindowfashions.com/how-to-clean	VENETA · CARE Faux wood blinds The easy one. Close the slats one way, wipe with a damp cloth, flip and repeat. A drop of dish soap handles kitchen grease. Skip furniture polish, which leaves a dust-attracting film. Never use bleach, ammonia, solvent cleaners, steam cleaners, or a magic-eraser sponge. All of them remove finish, and finish damage is not a manufacturing defect. 1-855-558-1222 · venetawindowfashions.com/how-to-clean

VENETA · CARE Vinyl and fabric verticals, DualDrape™ Vinyl louvres wipe clean in place. Fabric vanes unclip: hand wash cool, hang flat to dry, re-clip. Never machine dry a vane. Never use bleach, ammonia, solvent cleaners, steam cleaners, or a magic-eraser sponge. All of them remove finish, and finish damage is not a manufacturing defect. 1-855-558-1222 · venetawindowfashions.com/how-to-clean	VENETA · CARE Shutters Dust the louvres closed in one direction, then reverse them and do the other side. Pay attention to the frame corners. On a painted finish, no solvents and no polish. Never use bleach, ammonia, solvent cleaners, steam cleaners, or a magic-eraser sponge. All of them remove finish, and finish damage is not a manufacturing defect. 1-855-558-1222 · venetawindowfashions.com/how-to-clean
